A Night of STEM and FUN with ACEP and ARE

Wednesday, January 22, 2025 - 6 P.M.

Anchorage Loussac Public Library - Marston Theater

Doors open at 5:30 P.M.

Join the Alaska Center for Energy and Power and Alaska Resource Education for a night of fun and engaging, science-based activities for youth ages K-12. Your school-age children will enjoy an evening filled with learning, science adventures, and fun! Snacks will be provided for kids.

Parents, while the kids are having fun join the Alaska Center for Energy and Power and partners for a town hall event designed to facilitate the free expression of opinions on the implications of Carbon capture and storage. Learn how Alaska's geology and new regulatory framework has the potential to support diverse carbon storage projects aligned with low carbon development. Panelists will include state and federal agencies charged with managing the state's pore space resources and providing regulatory oversight, followed by a Q&A session.

For more information around developments on CCUS in Alaska visit: <https://ine.uaf.edu/carbon>.

UA is an affirmative action/equal opportunity employer, educational institution and provider and prohibits illegal discrimination against any individual: www.alaska.edu/nondiscrimination.
