Well spacing regulations protect the oil and gas rights of adjacent landowners and maximize resource recovery by establishing default limits on how close, under the land's surface, oil and gas wells can be to property lines where ownership changes hands. These limits are set forth in a regulation, 20 AAC 25.055. Operators must abide by the default limits unless they apply for, and

obtain, an exception to those limits. Although exceptions to the default limits are not unusual, AOGCC carefully evaluates each application, and typically grants them only when actual geologic conditions demonstrate that the proposed subsurface location of a well is necessary to reach otherwise unreachable oil or gas and that both the rights of adjacent landowners and underground drinking water can be protected. As a general matter, AOGCC does not have extensive authority over surface impacts such as noise, emissions, or construction.

This notice does not contain all the information filed by Hilcorp. To obtain more information, contact the AOGCC's Special Assistant, Samantha Coldiron, at (907) 793-1223 or samantha.coldiron@alaska.gov.
