

**Notice of Public Hearing**  
**STATE OF ALASKA**  
**ALASKA OIL AND GAS CONSERVATION COMMISSION**

RE: Docket Numbers: CO-24-009 and AIO-24-019

By application dated June 20, 2024, ConocoPhillips Alaska, Inc. (CPAI), as the operator of the Kuparuk River Unit (KRU), requests that the Alaska Oil and Gas Conservation Commission (AOGCC) approve Pool Rules establish rules for the development of the Coyote Oil Pool (COP) in the KRU and an Area Injection Order (AIO) to allow enhanced oil recovery (EOR) injection activities in the COP.

The AOGCC prescribes Pool Rules that govern development of oil and gas pools when a modification of a statewide regulation is needed to facilitate development of the pool. Some common rules are modification of the permit to drill application process to streamline applications and modify the data collection requirements when additional data would not add to the understanding of the geology in the project area. Additionally, the AOGCC approves injection orders for several purposes, including EOR, storage, and disposal either on an individual well or area wide basis in Alaska. EOR injection orders establish rules for conducting operations that are intended to increase the amount of oil or gas that could be recovered from a pool by one or more of the following mechanisms, maintain reservoir energy, sweeping oil through the reservoir to a production well, or modifying the properties of the oil to make it more mobile. This is consistent with the portion of the AOGCC's mission that seeks to promote greater ultimate recovery.
