Additional Narrative:

Erickson (Nursing): I believe our current regulations project will allow APRNs to supervise unlicensed personnel including medical assistants and estheticians, current regulations only allow for supervision of nursing related fields, but we know there's overlap.

The way I see many of these new procedures is that with the appropriate population foci, and proper education and training all of these are in the scope of the appropriate APRN. It's impossible to list all the new products and procedures that will come in the future so making regulation with that in mind is important.
